

Leader's guide

Thanks for stepping up to keep your school safe! This guide will help you facilitate natural gas pipeline safety training with your staff. We've packaged this information so that it's easy to share during a large-group training (such as an in-service day). The training will take about 45 minutes start to finish.

Who to invite:

- School district superintendent
- School principal and vice principal
- Facilities director
- School security
- School-based law enforcement
- Faculty involved in safety initiatives
- Administrative support staff
- Janitorial, groundskeeping and maintenance staff
- School bus driver

Presentation flow:

1. **Welcome (three minutes).** Welcome the group. Explain that you're here to discuss an important aspect of school safety: natural gas.
2. **Play the video at alliantenergy.com/safeschools (15 minutes).** This is the main part of the presentation. The video is about 15 minutes and covers everything your group needs to know.
3. **Walk through the participant handout (10 minutes).** Find digital copies at alliantenergy.com/safeschools.
4. **Take the quiz (10 minutes).** Solidify learning with this quiz and review the answers as a group. Digital copies available at alliantenergy.com/safeschools.

Answers:

1. Yes
 2. True
 3. Yes
 4. 2, 3, 1, 4
 5. All
 6. All
 7. 811
5. **Provide your feedback (five minutes).** Help us improve this training! We invite you and your attendees to take a quick survey at alliantenergy.com/safeschools.

After the meeting, be sure to update your school's Emergency Response Plan if needed. Thanks for keeping your school and community safe and prepared!
